

Hotcourses keep cool

For a number of years **PURIFIED AIR** has held preferred installer status for all the leading brand names of air conditioner including Mitsubishi, Fujitsu, Daikin, Toshiba and Trane.

Purified Air believe that any system installed should be absolutely right for the location and the company offers a free site survey anywhere in the UK to ensure the optimum scheme is specified. Installations are always carried out by qualified engineers so that the units are sited and installed correctly.

Recently Purified Air installed a ventilation and air conditioning scheme at Hotcourses' Hammersmith offices. Hotcourses is the UK's largest publisher of retail guides to courses and colleges and is also responsible for Britain's most popular commercial education website, www.hotcourses.com.

The company's requirements arose due to a move to new offices, which were not air conditioned, unlike their previous premises. Since Hotcourses knew the benefits for staff of working in an air conditioned environment they contacted us and asked us to specify a scheme. After carrying out a site survey a total of 15 wall and ceiling mounted Mitsubishi units were supplied as the best solution for their needs.
